M. de Waele, Brussels

S. Yokota, Yamanashi

Springer International

Founded in 1958. Volumes 1–3 were titled “Zeitschrift für Zellforschung und mikroskopische Anatomie”, with the subtitle “Abteilung Histochemie”. Beginning with Volume 4 the title was changed to “Histochemie/Histochemistry/Histochimie”. From Volume 38 the journal is called “Histochemistry”.

### Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out: that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

*While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.*

### Special regulations for photocopies in the USA

Photocopies may be made for personal or inhouse use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0301-5564, the

volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

This journal is included in both the Springer Journals Preview Service and the ADONIS service.

The Springer Journals Preview Service offers the tables of contents and BiblioAbstracts via Internet several weeks before the new issue reaches the subscribers. Tables of contents are free of charge; Biblio Abstracts are available for a small annual fee. Details can be obtained by sending an e-mail message containing the line *help* to [svjps@dhdspri6.bitnet](mailto:svjps@dhdspri6.bitnet).

In the ADONIS service copies of individual articles can be printed out from compact discs (CD-ROM) on demand. An explanatory leaflet giving further details of the scheme is available from the publishers on request.

# Journals Preview Service

The number of journals covered by the Springer Journals Preview Service will increase to more than 80 in early 1994 and includes titles from the life sciences, medicine, physics, earth sciences and engineering.

This service offers

tables of contents and BiblioAbstracts via Internet from our mailserver

with

automatic delivery several weeks before you receive the new issue.

Tables of contents are free of charge; all BiblioAbstracts are available for US\$ 20,- per year.

For details please send an e-mail message containing the line

# Technical instructions for manuscripts submitted on diskette

**Submission of a paper on diskette can mean a considerably shorter publication period**, but only if a few basic rules are observed in preparing the text file. Otherwise it is more economical to typeset conventionally using the hard copy.

**Please note:** authors wishing to submit diskettes are requested to wait until the review process has been completed.

- Please follow the **Instructions to Authors** for the appropriate journal when structuring the subject matter of your paper.
- Whenever possible, please submit your text on diskettes formatted for DOS or Macintosh systems.
- If possible, please store your text in two versions:
  1. In the standard data file format offered by your word processing system;
  2. In one of the data interchange formats listed below. Many word processing systems offer the option of using another file format when a text is saved or stored. The formats, listed here in declining order of preference, are:
    - RTF (Microsoft Rich Text Format)
    - DCA/RFT (Document Containment Architecture/Revisable Form Text)
    - DCA/FFT (Document Containment Architecture/Final Form Text)
    - ASCII or "text only"
- Always keep a copy of your diskette.
- Make sure your diskette is adequately packed when preparing it for dispatch.
- Enclose a printout of the **final text** with your diskette. The text file and the printout **must correspond** exactly. Any deviations may delay processing, involve high correction costs and make it uneconomical to use the diskette.
- It is not necessary to incorporate any special page layout in your text.
- Input your text continuously; in other words, only insert **hard returns** (↵) at the ends of paragraphs or headings, subheadings, lists etc.
- Do not use the space bar to make **indents** (e.g. to indicate paragraphs or in lists). A tabulator or an indent command should be used for this purpose.
- Please use the automatic pagination function incorporated in your word processing system, i.e. do not insert page numbers manually.
- Any words or phrases in the text that you wish to **emphasize** should be indicated throughout the paper in italic script or, if this is not available, by underlining.

**Boldface type** should normally only be used in the running text for certain mathematical symbols, e.g. vectors. In table titles, the word "Table" and the table number should be in boldface. In figure legends, the abbreviation "Fig.", the figure number, and letters referring to figure parts (a, b, etc.) should also be in boldface.
- **Headings** can be in boldface for visual emphasis.
- **Hyphen/dash coding**

Hyphen	high-resolution
En-dash	1990--1992, Diabetologia 25:345--352
Em-dash	Bacteria -- often in high numbers -- were found
Minus sign	at a temperature of --75°C
- Please place all tables at the end of your file. Always separate the individual columns using tabulators, not using the space bar.
- Please delete any annotations or comments from the final text file. Please send us only the **final updated version** on your diskette.

Springer International

**Please enclose this section completed with your diskette**

# A quality journal for the neuroscientist

The journal's coverage includes vertebrate and invertebrate:

- structural biology
- functional microanatomy
- neurocytology
- neuroendocrinology
- endocrinology
- reproductive biology
- morphogenesis
- immune cells and systems
- immunocytology
- molecular cell structure

## Theory and Strategy in Histochemistry

A Guide to the Selection  
and Understanding  
of Techniques

With the collaboration of  
A. P. Andersen, E. Hasselager,  
P.-E. Høyer, M. Møller,  
P. Prentø, B. van Deurs

1991. XVIII, 591 pp. 74 figs.  
12 tabs. Hardcover DM 123,-  
ISBN 3-540-19311-1

You will find the answer in this book, which helps *you* as a scientist in biomedical research and routine service laboratories select and develop histochemical and cytochemical techniques.

The book is organized into seven sections:

- general considerations
- a review of techniques according to mechanism
- tissue processing
- the staining of chemical entities
- enzyme histochemistry
- other techniques and
- an introduction to applied histochemistry.

The text has been appended with a "Note to the Reader" so that readers with different backgrounds can select the sections and sequence most appropriate for their particular needs.

## Molecular Biology and Its Application to Medical Mycology

1993. XIV, 258 pp. 90 figs. (NATO ASI Series H: Cell Biology, Vol. 69) Hardcover DM 240,- ISBN 3-540-54609-X

Presented here are recent achievements in the molecular biology of non-pathogenic yeast and filamentous fungi as well as human pathogens. The book is divided into four sections:

- Molecular Biology of Yeast;
- Molecular Biology of Filamentous Fungi;
- New Tools and Perspectives for Medical Mycology;
- Fungal Morphogenesis.

It focuses on aspects of medical mycology, namely, isolation of specific genes and strategies for developing new targets for antifungal therapy.
